A BARE-FOOTED GROOM

About twenty years ago a young fellow named Johnson, in the wilds of the Cheat Mountain in West Virginia, made up his mind to be married.

"But you have not a penny," remonstrated his friends.

"I have my hands. A man was given hands—one to scratch for himself, the other for his wife," he said.

On the day of the wedding Johnson appeared in a whole coat and trousers, but barefooted.

"This is hardly decent," said the clergyman. "I will lend you a pair of shoes."

"No," said Johnson, "when I can buy shoes I will wear them—not before."

And he stood up to be married without any thought as to his feet. The same stolid conduct showed itself in his future course.

What he had no money to pay for he did without. He hired himself to a family for a year's work. With the money he saved he bought a couple acres of timber land and a pair of sheep, built him self a hut, and went to work on his ground.

His sheep increased. As time flew by he bought more; then he sold off the cheaper kinds, and invested in Southdown and French Merino. His neighbors tried by turns raising cattle, horses, or gave their attention to experimental farming.

Johnson having found that sheep raising in his district brought a handsome profit, stuck to it. He had that shrewdness in seeing the best way, and that dogged persistence in following it, which are the elements of success.

Stock buyers from the Eastern markets found that Johnson's fleeces were the finest and his mutton the sweetest on the Cheat. He never allowed their reputation to fail—the end of which course is, the man who married barefooted is now worth a large property.

The story is an absolutely true one, and may point a moral for the herds of stout, able-bodied men who crowd the cities complaining that they must starve for want of work.—Greenbrier Independent of 1875.
